DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Goddard (US 5,034,039).

Claims 12-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Koval et al. (US 4,908,132).

Claims 18-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Henry (US 2,225,990).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.

Application/Control Number: 10/743,868

Art Unit: 3749

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Goddard in view of reference AK, cited by the applicants. Goddard is considered to clearly anticipate the claimed invention, except for the claimed desiccant particle color change when wet. Reference AK is considered to disclose desiccant particle color change when wet on page 4. It would have been obvious to one skilled in the art to combine the clearly anticipated teachings of Goddard with the desiccant particle color change when wet, considered disclosed in reference AK, for the purpose of providing an indication of when a drying agent is wet such that in needs replacement or rejuvenation.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference A, cited in this action, is considered to disclose an apparatus and method for removing moisture from a test sample, including aerosols.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ira S. Lazarus can be reached on 571 272 4877. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
